Asset Optimization

Optimal results begin with operation visibility

Ground Centric247 delivers continuous visibility, and advanced tools to manage your assets and ground teams from a single platform.

Seeing your operations 'as-it-happens' with access to insightful data is what drives smart decision making. Combine that with mobility and real-time communications, and you've got the answer to improving your asset utilization.

With less time downtime, you can maximise productivity to ensure that your assets deliver business value from the moment they're needed till the completion of the task

To have a visibility on See where every powered and non-powered fixed and mobile asset is, when you need it, and know who's using it
Maps show the location and status of all assets in real-time
Location of Powered and un-powered assets, above or below ground, located indoors or outdoors, landside or airside

Automate key processes to improve asset utilization
Real time event updates are automatically sent to the teams and individuals who need them
Smart automation speeds up routine recurring tasks such as asset and workload provisioning
Jobs are automatically updated with dynamic scheduling

Intelligent management tools improve productivity and ROI
Track your asset utilization rates and have the tools at your fingertips to improve performance
See operational issues as they arise and respond immediately
Accurate visibility for asset utilization helps facilitate billing for the time consumed on job which allows better profitability Accurately track and bill time on the job for better profitability

Manage your assets and ground teams in real-time, all from a **single integrated platform.**

ASSETS
