Management

Unsurpassed visibility and control of resources and workflows

The management framework within Ground Centric247 enables management teams to efficiently coordinate a large number of fixed and mobile assets across a single platform.

GroundCentric247 provides continual visibility of your operations and real time insight reporting, including KPI dashboards. Policy-based automation and responsive cloud-scale operations require less manual effort and bring significant cost savings – a key management expectation today.

With less time spent on routine tasks, you can improve productivity and safety across the entire team, maximise resource utilization and focus on tasks that drive value.

Workforce Management

- See operational issues as they arise and respond immediately.

- Automate communications + job assignment, dynamically schedule and trigger tasks.

- Automate advanced controls for safety and security.

- Staffing costs associated with planning, managing and supporting ground operations are reduced

Work Time Management

- Accurately track and bill 'time-on-job'. Work logbook technology ensures your workforce is compliant to safety rules and laws

Asset utilisation and time tracking

- Quickly and simply match the best people and resources for the job to minimise downtime and aircraft turnarounds

- Ensure accurate billing, cost allocation and utilization driven assent maintenance plans

- Asset Life Cycle Management Maximise the value derived from assets over their lifetime

- Automate proactive asset management tasks

Manage your assets and ground teams in real-time, all from a **single integrated platform.**

ASSETS
